(C) ASSESSMENT MANAGER'S CONDITIONS (COUNCIL)

(a) Development assessable against the Planning Scheme

1. Development must be carried out generally in accordance with the approved plans and the facts and circumstances of the use as submitted with the application, subject to any alterations:
 - found necessary by Council's delegated officer at the time of examination of the engineering plans or during construction of the development because of particular engineering requirements; and
 - to ensure compliance with the following conditions of approval.
2. Timing of Effect
 - 2.1 The conditions of the development permit must be complied with to the satisfaction of Council's delegated officer prior to the commencement of the use except where specified otherwise in these conditions of approval.
 - 2.2 Prior to the commencement of use, the applicant must notify Council that all the conditions of the development permit have been complied with, except where specified otherwise in these conditions of approval.
3. General
 - 3.1 The applicant/developer is responsible for the cost of necessary alterations to existing public utility mains, services or installations required by works in relation to the proposed development or any works required by condition(s) of this approval.
 - 3.2 All payments or bonds required to be made to the Council pursuant to any condition of this approval must be made prior to commencement of the use and at the rate applicable at the time of payment.
 - 3.3 All works must be designed, constructed and carried out in accordance with FNQROC Development Manual requirements (as amended) and to the satisfaction of Council's delegated officer.
 - 3.4 Waste Management

On site refuse storage area must be provided and be screened from view from adjoining properties and road reserve by one (1) metre wide landscaped screening buffer, 1.8m high solid fence or building.

Where bulk bins are used and are to be serviced on site, certification by a Registered Professional Engineer of Queensland (RPEQ) must be provided to Council prior to the issue of a building permit which demonstrates that internal access is of adequate design and construction to allow waste collection/delivery vehicles to enter and exit the site in a forward gear.
 - 3.5 Noise Nuisance
 - 3.5.1 Refrigeration equipment, pumps, compressors and mechanical ventilation systems must be located, designed, installed and maintained to achieve a maximum noise level of 3dB(A) above background levels as

measured from noise sensitive locations and a maximum noise level of 8dB(A) above background levels as measured from commercial locations.

- 3.5.2 The applicant is required to install and maintain suitable screening to all air conditioning, lift motor rooms, plant and service facilities located at the top of or on the external face of the building. The screening structures must be constructed from materials that are consistent with materials used elsewhere on the facade of the building. There are to be no individual external unscreened air conditioning units attached to the exterior building facade.
 - 3.6 The authorised operating hours for the service station and associated shop are limited to between 5am and 8.30pm, seven (7) days per week. No operations associated with the service station or shop are permitted on-site outside these hours, including commercial refuse disposal or the replenishing of underground fuel storage tanks.
 - 3.7 Any fuel ventilation outlets must be located as far away as practically possible from the common boundary with Lot 16 on SP195707.
4. Infrastructure Services and Standards
 - 4.1 Access

A commercial access crossover must be upgraded/constructed (from the edge of Malone Road to the property boundary of the subject land) in accordance with the FNQROC Development Manual, to the satisfaction of Council's delegated officer.
 - 4.2 Stormwater Drainage/Water Quality
 - 4.2.1 The applicant/developer must take all necessary steps to ensure a non-worsening effect on surrounding land as a consequence of the development.
 - 4.2.2 Prior to building works commencing the applicant must submit a Stormwater Management Plan and Report prepared and certified by a suitably qualified design engineer (RPEQ) that meets or exceeds the standards of design and construction set out in the Queensland Urban Drainage Manual (QUDM) and the FNQROC Development Manual to the satisfaction of Council's delegated officer.
 - 4.2.3 The Stormwater Management Plan and Report must include provisions to intercept and control stormwater flows along driveways and hardstand areas.
 - 4.2.4 The applicant/developer must construct the stormwater drainage infrastructure in accordance with the approved Stormwater Management Plan and Report.
 - 4.2.5 All stormwater drainage must be collected from site and discharged to an approved legal point of discharge.

4.2.6 In addition to the Stormwater Management Plan, and prior to building works commencing, the applicant/developer must submit an Oily Water Management Plan, prepared and certified by a suitably qualified design engineer (RPEQ). The Plan must demonstrate how contaminants such as oil and/or fuel will be removed and stored prior to stormwater being discharged from the site.

4.3 Car Parking/Internal Driveways

4.3.1 The applicant/developer must ensure the service station and shop is provided with a minimum of 16 on-site car parking spaces as depicted on the approved plans (including 1 disabled parking space) as well as 1 RV parking space and 1 service vehicle parking space which are available solely for the parking of vehicles associated with the use of the premises. These parking spaces must be provided in addition to any fuel bowser parking spaces. The caretaker's accommodation must be provided with one (1) undercover parking space.

4.3.2 All car parking spaces and trafficable areas, including the truck turn around area and caretaker's accommodation driveway must be concrete sealed, line-marked and appropriately drained prior to the commencement of the use, to the satisfaction of Council's delegated officer.

4.3.3 All car parking spaces and trafficable areas must be constructed in compliance with the following standards, to the satisfaction of Council's delegated officer:

- Australian Standard AS2890:1 Off Street Parking – Car Parking Facilities;
- Australian Standard AS1428:2001 – Design for Access and Mobility.

4.3.4 The applicant/developer must ensure the development is provided with three (3) bicycle parking spaces in proximity to the shop building entrance/s.

A sign must be erected in proximity to the access driveways indicating the availability of on-site parking.

4.4 Traffic Impact Assessment - Roadworks External (Malone Road)

A traffic impact assessment must be prepared by a Registered Professional Engineer of Queensland (RPEQ) in order to estimate the proposed traffic likely to be generated by the development and identify any augmentations or improvements required to the existing road network (Malone Road) to provide safe and convenient access to the site.

The traffic impact assessment should specifically address external works required on Malone Road between the intersection of the Kennedy Highway to a point 10 metres past the access to the site. Malone Road is currently not constructed to standard, so augmentation works should include widening on both sides of the road, turn lanes, traffic islands (if necessary), line-marking, signage and asphalt overlays to minimise damage made by turning vehicles.

The traffic impact assessment must include detailed plans.

Plans for the abovementioned works must be submitted to Council as part of a subsequent application for operational works.

4.5 Landscaping

4.5.1 Prior to building works commencing, a landscape plan must be prepared for the site and submitted to Council's delegated officer for consideration and approval. The extent of landscaping on site should be generally consistent with that shown on the submitted plan/s (Site Plan).

4.5.2 The landscape plan should include a three (3) metre wide landscape buffer along the southeast boundary for a length consistent with that shown on the submitted site plan. This southeast boundary landscape buffer must include shrubs, plants and trees that will grow to form an effective visual buffer of no less than four (4) metres in height at maturity and should include at least 25% larger more advanced plant stock.

4.5.3 All plant varieties must be generally in accordance with Schedule A of Planning Scheme Policy No. 9 (Landscaping Policy).

4.5.4 The landscaping of the site must be carried out prior to the commencement of the use and in accordance with the endorsed landscaping plan, and irrigated, mulched and maintained for the life of the development to the satisfaction of Council's delegated officer.

4.6 Acoustic Fencing

Prior to the commencement of the use, the applicant/developer must erect a solid 1.8m high, acoustic fence of neutral colour (timber fencing not permitted) along the southeast boundary (common with Lot 16 on SP195707) for a length of no less than 110 metres from the southern corner of the site.

All fencing on-site must be maintained in good order and safe repair for the life of the development, to the satisfaction of Council's delegated officer.

4.7 Lighting

The developer shall locate, design and install lighting to operate from dusk to dawn within all areas where the public will be given access, which prevents the potential for light spillage to cause nuisance to neighbours and must be provided in accordance with Australian Standard 1158.1 – Lighting for Roads and Public Spaces.

Illumination resulting from direct, reflected or other incidental light emanating from the subject land does not exceed 8 lux when measured at any point 1.5m outside the property boundary of the subject site. The lighting fixtures installed on site must meet appropriate lux levels as documented within Australian Standard 4282 – Control of the Obtrusive Effects of Outdoor Lighting.

NOTE: The design is to integrate the principles of Crime Prevention through Environmental Design (CPTED) theory. Lighting design is to illuminate potential areas of concealment and is to project illumination so that a human face is easily discernible from 15 metres and there is to be sufficient night lighting, which renders people, colours, vegetation and objects correctly. i.e. 'white' light. Particular attention should be given to pathways, driveways and common external spaces.

4.8 Signage

Advertising signage locations are limited to the fuelling canopy fascia, shop building fascia, walls and windows and the pylon sign. The pylon sign must be used to advertise fuel prices only. Advertising signage must not move, revolve, strobe or flash (can be illuminated).

Any advertising signage must be maintained in good order and safe repair for the life of the development, to the satisfaction of Council's delegated officer.

4.9 Non-Reticulated Water Supply

The service station and caretaker's accommodation must be provided with a potable water supply that can satisfy the standards for drinking water set by the Australian Drinking Water Guidelines 2004 (National Health and Medical Research Council and the National Resource Management Ministerial Council).

All non-potable sources of water must be sign posted "non-potable water supply" or similar in order to deter consumption.

4.10 Sewerage Connection

All on-site effluent disposal associated with the approved uses must be in compliance with the latest version of On-Site Domestic Wastewater Management Standard (ASNZ1547) to the satisfaction of Council's delegated officer.

(D) ASSESSMENT MANAGER'S ADVICE

(a) Food Premises

Premises proposed for the storage and preparation, handling, packing or service of food must comply with the requirements of the Food Act 2006.

(b) Compliance with applicable codes/policies

The development must be carried out to ensure compliance with the provisions of Council's Local Laws, Planning Scheme Policies, Planning Scheme and Planning Scheme Codes to the extent they have not been varied by a condition of this approval.

(c) Compliance with Acts and Regulations

The erection and use of the building must comply with the Building Act and all other relevant Acts, Regulations and Laws, and these approval conditions.

(d) Environmental Protection and Biodiversity Conservation Act 1999

The applicant is advised that referral may be required under the *Environmental Protection and Biodiversity Conservation Act 1999* if the proposed activities are likely to have a significant impact on a matter of national environmental significance. Further information on these matters can be obtained from www.environment.gov.au

(e) Cultural Heritage

In carrying out the activity the applicant must take all reasonable and practicable measures to ensure that no harm is done to Aboriginal cultural heritage (the “cultural heritage duty of care”). The applicant will comply with the cultural heritage duty of care if the applicant acts in accordance with gazetted cultural heritage duty of care guidelines. An assessment of the proposed activity against the duty of care guidelines will determine whether or to what extent Aboriginal cultural heritage may be harmed by the activity. Further information on cultural heritage, together with a copy of the duty of care guidelines and cultural heritage search forms, may be obtained from www.datsip.qld.gov.au
