ASSESSMENT MANAGER CONDITIONS

(A) ASSESSMENT MANAGER’S CONDITIONS (COUNCIL)

(a) Development assessable against the Planning Scheme

1. Development must be carried out generally in accordance with the approved plans and the facts and circumstances of the use as submitted with the application, subject to any alterations:
 - found necessary by Council’s delegated officer at the time of examination of the engineering plans or during construction of the development because of particular engineering requirements; and
 - to ensure compliance with the following conditions of approval.
2. Timing of Effect
 - 2.1 The conditions of the development permit must be complied with to the satisfaction of Council’s delegated officer prior to the endorsement of the plan of survey, except where specified otherwise in these conditions of approval.
3. General
 - 3.1 The development approval would not have been issued if not for the conditions requiring the construction of infrastructure or the additional payment condition within these conditions of approval.
 - 3.2 The applicant/developer is responsible for the cost of necessary alterations to existing public utility mains, services or installations required by works in relation to the proposed development or any works required by condition(s) of this approval.
 - 3.3 All payments or bonds required to be made to the Council pursuant to any condition of this approval must be made prior the endorsement of the plan of survey and at the rate applicable at the time of payment.
 - 3.4 The developer must relocate (in accordance with FNQROC standards) any services such as water, sewer, drainage, telecommunications and electricity that are not wholly located within the lots that are being created/serviced

where required by the relevant authority, unless approved by Council's delegated officer.

3.5 Where approved existing buildings and structures are to be retained, setbacks to any new property boundaries are to be in accordance with Planning Scheme requirements for the relevant structure and/or Queensland Development Code. A plan demonstrating compliance of any existing buildings or structures that are in close proximity to any new property boundary must be submitted prior to endorsement of the plan of survey.

3.6 All works must be designed, constructed and carried out in accordance with FNQROC Development Manual requirements and to the satisfaction of Council's delegated officer.

3.7 Rural Addressing

The applicant must pay the relevant fee per additional lot for provision of rural addressing at the rate identified in the Fees and Charges Schedule at the time of payment.

3.8 Charges

All outstanding rates, charges and expenses pertaining to the land are to be paid in full.

4. Infrastructure Services and Standards

4.1 Access

4.1.1 A single sealed access crossover must be constructed to service both proposed lots (from the edge of Speewah Road for a distance of at least ten (10) metres) in accordance with FNQROC Development Manual Standards (as amended), to the satisfaction of Council's delegated officer.

4.1.2 From the end of the sealed access crossover required under 4.1.1, an access driveway is to be constructed within road reserve to the boundary of proposed Lot 25. The access driveway must have a gradient generally compliant with AS2890 and be engineered with appropriate surface treatment/s to ensure the access is safe.

4.1.3 The access driveway and sealed access crossover must be designed and constructed to ensure:

- Stormwater does not adversely impact on Speewah Road with respect to discharge and velocities and sediment deposits;

- Does not create scouring on the downslope side of the access driveway where stormwater is being concentrated and discharging across the driveway; and
- The sealed access crossover accommodates the existing drainage regime. A floodway type access (Standard Drawing S1105) may be appropriate.

4.1.4 The access track to proposed Lot 27, within the proposed easement, must be constructed to a gravel all-weather standard, to the satisfaction of Council's delegated officer.

4.1.5 The sealed access crossover and access driveway must be designed and certified by an RPEQ to ensure they are safe and drainage matters have been appropriately addressed. A copy of the RPEQ design and certification must be provided to Council's delegated officer.

The driveway must be constructed in accordance with the RPEQ certified plan and the supervising RPEQ must provide certification that the driveway has been constructed in accordance with the certified plan.

4.2 Access and Services Easement

An access and services easement must be established within proposed Lot 25 in favour of proposed Lot 27. Easement documents must be made available to Council for review prior to the endorsement of the plan of survey.

4.3 Stormwater Drainage

The applicant must ensure a non-worsening effect on surrounding land as a consequence of the development and must take all reasonable and practicable measures to ensure discharge occurs in compliance with the Queensland Urban Drainage Manual (QUDM) and the FNQROC Development Manual.

4.4 On-Site Wastewater Management

At the time of construction of a new dwelling on any lot, any associated on-site effluent disposal system must be constructed in compliance with the latest version On-Site Domestic Wastewater Management Standard (AS/NZS1547) to the satisfaction of the Council's delegated officer.

5. Additional Payment Condition/s (section 130 of the Planning Act 2016)

5.1 The additional payment condition has been imposed as the development will create additional demand on trunk infrastructure which will create additional trunk infrastructure costs for council.

- 5.2 The developer must pay a one-off payment of \$4,585.00 (per additional lot) as a contribution toward trunk infrastructure with the amount of the contribution increased on 1 July each year in accordance with the increase for the PPI index for the period starting on the day the development approval takes effect, adjusted by reference to the 3-yearly PPI index average to the date of payment.
- 5.3 The trunk infrastructure for which the payment is required is:
- The trunk transport network servicing the land (\$4,585.00 per additional lot)
- 5.4 The developer may elect to provide part of the trunk infrastructure instead of making the payment.
- 5.5 If the developer elects to provide part of the trunk infrastructure the developer must:

 - Obtain the necessary approvals for the part of the works;
