General advice	
1.	Terms and phrases used in this document are defined in the <i>Planning Act 2016</i> its regulation or the State Development Assessment Provisions (SDAP), v2.4. If a word remains undefined it has its ordinary meaning.
2.	Words underlined in these conditions have the same meaning given in the Glossary of Terms found within the state code 16: Clearing native vegetation.
3.	A reference to state code 16 is a reference to the version of the state code 16: Clearing native vegetation in effect as at the date of this development approval.
4.	Despite this development approval, other permits or approvals may be required for the clearing of vegetation. To determine if the proposed clearing requires other approvals under other local, State or federal laws go to www.qld.gov.au (search 'vegetation clearing requirements').

1904-10896 SRA

Attachment 3—Reasons for referral agency response*(Given under section 56(7) of the Planning Act 2016)***The reasons for the department's decision are:**

- The development proposal demonstrates that adverse impacts of clearing have been reasonably minimised.
- Clearing associated with the proposed development is unlikely to contribute to or accelerate land degradation through waterlogging, or salinisation of groundwater, surface water or soil.
- There are no wetlands within 100m of the proposed (potential) clearing.
- The proposal is not likely to have a Significant Residual Impact (SRI) as permanent removal of vegetation is not proposed and less than approximately 0.2ha of a least concern regional ecosystem would be required to be cleared for a fire management line for each lot within the relevant distance if the vegetation exemption was enabled.
