- 6.2.4 Emerging community zone code
- 8.2.4 Environmental significance overlay code
- 8.2.6 Flood hazard overlay code
- 9.4.2 Landscaping code
- 9.4.3 Parking and access code
- 9.4.4 Reconfiguring a lot code
- 9.4.5 Works, services and infrastructure code

## 6.2.4 Emerging community zone code

### 6.2.4.1 Application

- (1) This code applies to assessing development where:
  - (a) located in the Emerging community zone; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

### 6.2.4.2 Purpose

- (1) The purpose of the Emerging community zone code is to:
  - (a) identify land that is suitable for urban purposes and protect land that may be suitable for urban development in the future
  - (b) manage the timely conversion of non-urban land to urban purposes.
  - (c) prevent or discourage development that is likely to compromise appropriate longer term land use.
- (2) Mareeba Shire Council's purpose of the Emerging community zone code is to provide for the sequenced release of land to meet community need and market demand for new urban development in designated urban growth areas.

Urban development may occur in the zone in accordance with an approved structure plan but the primary purpose of the zone and the code is to reserve land for future urban development, the majority of which is likely to occur beyond the life of the planning scheme.

Urban growth areas are identified within the towns of Kuranda and Mareeba. These areas are subject to Local plan codes which include further provisions.

- (3) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Land that has the potential for development for urban purposes although may contain pockets of land unsuitable for development due to scenic or environmental constraints is preserved until detailed planning studies have occurred;
  - (b) Interim development does not compromise the future development potential of the land for urban purposes;
  - (c) Development of land is based upon the provision of infrastructure, consideration of environmental constraints and desired settlement pattern for the area;
  - (d) Development is supported by necessary transport infrastructure which is designed to provide and promote safe and efficient public transport use, walking and cycling;
  - (e) Development is supported by an internal road network and does not compromise the safety or efficiency of State-controlled or Local government collector roads;
  - (f) Land is developed in an orderly sequence and, for all but minor proposals, in accordance with a structure planning process;
  - (g) Land is developed in a sustainable manner to reflect the desired land use pattern of the local government area by integrating development sites, community infrastructure, open space and important natural features;
  - (h) Non-residential development may be supported where such uses directly support the day to day needs of the immediate residential community or the precinct is identified for non-residential uses and is planned for as part of a structure plan;
  - (i) Significant historical, architectural, topographic, landscape, scenic, social, recreational and cultural features, as well as natural habitat areas, wildlife corridors, wetlands and waterway corridors are protected and enhanced as part of the development of the zone; and

- (j) Roads and other transport corridors are coordinated and interconnected to ensure pedestrian, cyclists, public transport and private vehicles have accessibility between neighbourhoods, centres and other locations.

## 8.2.4 Environmental significance overlay code

### 8.2.4.1 Application

- (1) This code applies to assessing development where:
  - (a) land the subject of development is affected by a constraint category identified on the **Environmental significance overlay maps (OM-004a-z)**; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

Note—Biodiversity and Water quality are appropriately reflected in Overlay Map 4 and is required to be mapped by State Government in response to Environment and Heritage State Interests.

### 8.2.4.2 Purpose

- (1) The purpose of the Environmental significance overlay code is to identify and protect matters of environmental significance, which include matters of state environmental significance (MSES) as defined under the state planning policy.

The Environmental significance overlay code ensures that:

- (a) waterways and high ecological significance wetlands are protected and enhanced to maintain ecosystem services and hydrological processes and provide aquatic habitat for flora and fauna; and
  - (b) the environmental values of regulated vegetation, wildlife habitat, protected areas and legally secured offset areas are protected and managed.
- (2) The purpose of the code will be achieved through the following overall outcomes:
    - (a) the biodiversity values, ecosystem services and climate change resilience of areas of environmental significance are protected, managed, enhanced and rehabilitated;
    - (b) the biodiversity values of protected areas and legally secured offset areas are protected from development unless overriding community need is demonstrated;
    - (c) development is located, designed and managed to minimise the edge effects of development on areas of regulated vegetation and wildlife habitat;
    - (d) areas of regulated vegetation and wildlife habitat are managed to minimise biodiversity losses;
    - (e) development maintains, protects and enhances a regional network of vegetated corridors that assist in wildlife movement and contribute to the maintenance of habitat and biological diversity;
    - (f) development is appropriately setback from waterways and high ecological significance wetlands to minimise direct and indirect impacts on water quality and biodiversity; and
    - (g) riparian vegetation and vegetation associated with high ecological significance wetlands is protected and enhanced to improve water quality and natural ecosystem function.

## 8.2.6 Flood hazard overlay code

### 8.2.6.1 Application

- (1) This code applies to assessing development where:
  - (a) land the subject of development is located within a Flood hazard area identified on the **Flood hazard overlay maps (OM-006a-o)**; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

Note—Natural hazards are appropriately reflected in Overlay Maps 3, 6 and 8 and are required to be mapped by State Government in response to Hazard and Safety State Interests.

Note—where new information, including flood studies or flood modelling supersedes the Flood hazard overlay maps (OM-006a-o) Council may have regard to this new information in the application of the Flood hazard overlay code in the interests of the precautionary principle and the safety of persons and property.

- C. a Dwelling house only where the lot existed or had a lawful reconfiguring a lot approval at the commencement of the planning scheme and the land is included in a Residential zone or the Centre zone or where for minor intensification of existing Dwelling houses;
  - D. Rural activities where for Animal husbandry, Cropping or Permanent plantation;
  - E. Industrial activities and Commercial activities where it is accepted development that flood damage is incurred as an operational cost and where flood sensitive elements of the development or use are elevated above the defined flood level, including freeboard;
  - F. flood proofed Utility installations, Substations or Major electricity infrastructure;
  - G. conservation and natural area management; and
  - H. replacement of existing lawful development;

where there is no increase to the number of persons at risk of flood and where development reduces existing or potential risks to life and property.

- iv. protects surrounding land and land uses from increased flood hazard impacts;
  - v. elevates habitable rooms for all accommodation activities (including where for minor building work) above the defined flood level, including freeboard.
- (c) Development in the 'Significant flood hazard area':

  - ii. involves changes to the existing landform and drainage lines in this area only where detrimental impacts to the flood hazard risk of surrounding areas is avoided;
  - iii. is limited to:
    - A. Sport and recreation activities;
    - B. Industrial activities and Commercial activities where it is accepted development that flood damage is incurred as an operational cost and where flood sensitive elements of the development or use are elevated above the defined flood level, including freeboard;
    - C. Rural activities;

## 9.4.2 Landscaping code

### 9.4.2.1 Application

This code applies where it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

### 9.4.2.2 Purpose

- (1) The purpose of the Landscaping code is to ensure all development is landscaped to a standard that:
  - (a) complements the scale and appearance of the development;
  - (b) protects and enhances the amenity and environmental values of the site;
  - (c) complements and enhances the streetscape and local landscape character; and
  - (d) ensures effective buffering of incompatible land uses to protect local amenity.
  
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Landscaping is a functional part of development design and is commensurate with the intended use;
  - (b) Landscaping accommodates the retention of existing significant on site vegetation where appropriate and practical;
  - (c) Landscaping treatments complement the scale, appearance and function of the development;
  - (d) Landscaping contributes to an attractive streetscape;
  - (e) Landscaping enhances the amenity and character of the local area;
  - (f) Landscaping enhances natural environmental values of the site and the locality;
  - (g) Landscaping provides effective screening both on site, if required, and between incompatible land uses;
  - (h) Landscaping provides shade in appropriate circumstances;
  - (i) Landscape design enhances personal safety and reduces the potential for crime and vandalism; and
  - (j) Intensive land uses incorporate vegetated buffers to provide effective screening of buildings, structures and machinery associated with the use.

### 9.4.3 Parking and access code

#### 9.4.3.1 Application

This code applies to assessing development where it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

#### 9.4.3.2 Purpose

- (1) The purpose of the Parking and access code is to ensure:
  - (a) parking areas are appropriately designed, constructed and maintained;
  - (b) the efficient functioning of the development and the local road network; and
  - (c) all development provides sufficient parking, loading/service and manoeuvring areas to meet the demand generated by the use.
  
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Land uses have a sufficient number of parking and bicycle spaces designed in a manner to meet the requirements of the user;
  - (b) Parking spaces and associated manoeuvring areas are safe, functional and provide equitable access;
  - (c) Suitable access for all types of vehicles likely to utilise a parking area is provided in a way that does not compromise the safety and efficiency of the surrounding road network;
  - (d) Premises are adequately serviced to meet the reasonable requirements of the development; and
  - (e) End of trip facilities are provided by new major developments to facilitate alternative travel modes.

## 9.4.4 Reconfiguring a lot code

### 9.4.4.1 Application

- (1) This code applies to assessing development where:
  - (a) for Reconfiguring a lot; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

### 9.4.4.2 Purpose

- (1) The purpose of the Reconfiguring a lot code is to ensure that land is:
  - (a) arranged in a manner which is consistent with the intended scale and intensity of development within the area;
  - (b) provided with access to appropriate movement and open space networks; and
  - (c) contributes to housing diversity and accommodates a range of land uses.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Subdivision of land achieves the efficient use of land and the efficient provision of infrastructure and transport services;
  - (b) Lots are of a suitable size and shape for the intended or potential use having regard to the purpose and overall outcomes of the relevant zone or precinct.
  - (c) Subdivision of land creates lots with sufficient area and dimensions to accommodate the ultimate use, meet user requirements, protect environmental features and account for site constraints;
  - (d) A range and mix of lot sizes is provided to facilitate a variety of industry and housing types;
  - (e) Subdivision design incorporates a road network that provides connectivity and circulation for vehicles and provide safe and efficient access for pedestrians, cyclists and public transport;
  - (f) Subdivision design provides opportunities for walking and cycling for recreation and as alternative methods of travel;
  - (g) Subdivision of land provides and integrates a range of functional parkland, including local and district parks and open space links for the use and enjoyment of the residents of the locality and the shire;
  - (h) Subdivision of land contributes to an open space network that achieves connectivity along riparian corridors and between areas with conservation values;
  - (i) Subdivision within the Rural zone maintains rural landholdings in viable parcels;
  - (j) Land in historical townships is not reconfigured to be used for urban purposes; and
  - (k) Residential subdivision and greenfield development is designed to consider and respect:
    - i. topography;
    - ii. climate responsive design and solar orientation;
    - iii. efficient and sustainable infrastructure provision;
    - iv. environmental values;
    - v. water sensitive urban design;
    - vi. good quality agricultural land; and
    - vii. the character and scale of surrounding development.

<b>Area and frontage of lots</b>			

<p><b>PO1</b> Lots include an area and frontage that:</p> <ul style="list-style-type: none"> <li>(a) is consistent with the design of lots in the surrounding area;</li> <li>(b) allows the desired amenity of the zone to be achieved;</li> <li>(c) is able to accommodate all buildings, structures and works associated with the intended land use;</li> <li>(d) allow the site to be provided with sufficient access;</li> <li>(e) considers the proximity of the land to: <ul style="list-style-type: none"> <li>(i) centres;</li> <li>(ii) public transport services; and</li> <li>(iii) open space; and</li> </ul> </li> <li>(f) allows for the protection of environmental features; and</li> <li>(g) accommodates site constraints.</li> </ul>	<p><b>AO1.1</b> Lots provide a minimum area and frontage in accordance with <b>Table 9.4.4.3B.</b></p>	<p style="text-align: center;">✓ <b>Complies with PO1</b></p>	<p>Table 9.4.4.3.B dictates that land within the Emerging Communities Zone achieve a minimum lot size of 10 hectares and a minimum frontage of 100m. The proposed reconfiguration is therefore non-compliant with AO1.1.</p> <p>These minimum lot and frontage requirements are intended to advance and help achieve the overarching intent of the Emerging Communities Zone which is to preserve and protect land considered suitable for future residential development beyond the life of the Planning Scheme.</p> <p>As previously discussed, the subject site and immediate surrounding lots are considered to be significantly constrained from future urban development by both the existing size of the lots (which are consistent with the desired size of residential land not serviced by town sewer), the locations of the existing dwellings on these lots and the flood hazard constraint that encompasses most of the eastern half of the subject site as well as the land immediately</p>

The proposed development will not further compromise the development potential of the subject land anymore than it already is through existing configuration, built form and environmental constraints.</p> <p>The development represents logical infill development, making efficient and practical use of significantly constrained residential land and both proposed lots will allow the desired amenity of the zone to be achieved. The proposed development complies with PO1.</p>
<b>Existing buildings and easements</b>			
<p><b>PO2</b> Reconfiguring a lot which contains existing land uses or existing buildings and structures ensures:</p>	<p><b>AO2.1</b> Each land use and associated infrastructure is contained within its individual lot.</p>	<p>✓</p>	<p>Will comply.</p>

Performance outcomes	Acceptable outcomes	Complies	Comments
<p>(a) new lots are of sufficient area and dimensions to accommodate existing land uses, buildings and structures; and</p> <p>(b) any continuing use is not compromised by the reconfiguration.</p>	<p><b>AO2.2</b> All lots containing existing buildings and structures achieve the setback requirements of the relevant zone.</p>	<p>✓ <b>Complies with PO2</b></p>	<p>For residential land uses and structures like that contained on the subject site, Queensland Development Code setbacks of 1.5m from side and rear boundaries apply. Part of the existing dwelling (patio/carport awning) on proposed Lot 2 will be setback just 0.5 metres from the common boundary with proposed Lot 1.</p> <p>This lesser boundary setback will encroach on the access handle of proposed Lot 1 only and is not likely to have any detrimental amenity impacts on the continued use of Lot 1 for residential purposes. The development will comply with PO2.</p>
<p><b>PO3</b> Reconfiguring a lot which contains an existing easement ensures:</p> <p>(a) future buildings, structures and accessways are able to be sited to avoid the easement; and</p> <p>(b) the reconfiguration does not compromise the purpose of the easement or the continued operation of any infrastructure contained within the easement.</p>	<p><b>AO3</b> No acceptable outcome is provided.</p>	<p><b>n/a</b></p>	<p>Not applicable.</p>
