Attachment 3—Reasons for referral agency response(Given under section 56(7) of the *Planning Act 2016*)

- The department carried out an assessment of the development application against the State Development and Assessment Provisions (SDAP), State Code 1: Development in a state-controlled road environment and State code 6: Protection of state transport networks, and has found that, with conditions, the proposed development complies with the relevant assessment benchmarks as follows:
 - No direct access to the state-controlled road is required.
 - Potential stormwater, flooding or drainage impacts to the state-controlled road are appropriately managed.
 - The extraction area does not encroach beyond the property boundary, and it is unlikely that any filling, excavation or retaining structures will impact the state-controlled road.
 - The haul access is far enough away to ensure vehicle queueing does not impact the state-controlled road intersection.
 - Intersection widening works will ensure a truck and dog combination can safely enter and exit the state-controlled road intersection without crossing the centre line or veering onto the unsealed road shoulder.
