### 1.0 GENERAL DESCRIPTION

The site is currently vacant and has frontage to Antonio Drive, Mareeba.

The entire project encompasses 79 residential lots. This application is for Stage 3 which consists of 16 lots. It includes construction of part of Antonio Drive and construction of a new road.

The site is generally sparsely grassed with a moderate slope.

### 2.0 ROADWORKS

The road network is designed in accordance with the Conditions.

All road pavements have been designed in accordance with FNQROC Design Manual and Austroads Guide to Pavement Technology Part 2 Pavement Structural Design.

A design life of 20 years has been adopted for all pavements.

Prior to design California Bearing Ratio (CBR) testing has not been undertaken for the site. The CBR is to be evaluated prior to construction by in situ CBR, and 4 day soaked CBR all performed by an NATA registered materials testing authority using procedures prescribed by the Department of Main Roads and the Standards Association of Australia.

The pavement design shall be reassessed after completion of testing. For the purpose of the design the subgrade CBR is assumed to be 7.

### 3.0 STORMWATER DRAINAGE

The stormwater drainage system has been designed using the rational Method in accordance with Australian Rainfall and Runoff (ARR) and the Queensland Urban Drainage manual(QUDM)

In accordance with the QUDM recommendations, the minor system is contained within an underground system based on a 5 year return interval. The major system design is based on an average return interval of 100 years. This system uses a combination of the underground pipe system and overland flow.

Calculation of pit locations is based on flow width limitations as detailed in QUDM and a recurrence interval of 5 years.

Times of concentration are based on QUDM standard inlet times.

Runoff coefficients have been established in accordance with QUDM.

Intensity figures have been obtained from FNQROC Design Manual IFD Chart 15 Mareeba.

Pit capacities are based on FNQROC Design Manual Kerb Inlet Pit Design Charts including an appropriate blockage factor.

Road way capacities have been calculated using Manning's equation for all flows.

Pit and manhole losses have been estimated using charts in QUDM.

## **4.0 POTABLE WATER RETICULATION**

All reticulation mains have been designed in accordance with the FNQROC Design Manual and the Department of Natural Resources and Mines "Planning Guidelines for Water Supply and Sewerage". The full extent of the water supply works is shown on Dwg. C06.

A water supply analysis for all stages of the development using EPA Net software is available. It shows that an adequate domestic and fire fighting reticulation supply can be provided.

## **5.0 ELECTRICAL AND TELECOMMUNICATION RETICULATIONS**

The electrical reticulation system including street lighting is to be designed and documented by Simon Perkins and Associates. Written advice in accordance with Council's Decision Notice will be provided by Simon Perkins and Associates as soon as it is available.

### **3. Advisory Agency**

#### **Additional comments or information:**

##### **Water Management & Use**

##### **Riverine Protection**

The applicant's response to the Information Request was satisfactory. In the Information Request the applicant was advised as regards the requirements of the *Water Act 2000*. In the applicant's response, it was noted that the applicant was:-

- In the process of having the property surveyed so as to determine the precise extent of the high bank of the watercourse
- Aware of what authorities were required under the *Water Act 2000* to conduct activities (such as excavation, placement of fill and destruction of vegetation) within watercourses
- Intending to exclude the riparian strip from the development and affording them some level of formal protection.

If the applicant proceeds with the development and is consistent with the above advice (as stated in the Response to a Request for Further Information), then state interests as regards the *Water Act 2000* have been satisfied and the Water Management & Use section of Natural Resources & Water have no further requirements for the development.

### **Aboriginal Cultural Heritage**

Under section 23 of the *Aboriginal Cultural Heritage Act 2003* a person who carries out an activity must take all reasonable and practicable measures to ensure the activity does not harm Aboriginal cultural heritage (the "cultural heritage duty of care"). Maximum penalties for breaching the duty of care are \$750,000 for a corporation and \$75,000 for an individual.

Applicants will comply with the duty of care in relation to Aboriginal cultural heritage if they are acting in compliance with cultural heritage duty of care guidelines gazetted under the *Aboriginal Cultural Heritage Act 2003*, available on the Department's website, or in accordance with an agreement with the Aboriginal party for the area or a cultural heritage management plan approved under part 7 of the *Aboriginal Cultural Heritage Act 2003*.

Applicants should also undertake a search of the Aboriginal Cultural Heritage Database and the Aboriginal Cultural Heritage Register, administered by the Cultural Heritage Coordination Unit, Department of Natural Resources and Water. Application forms to undertake a free search of the Cultural Heritage Register and the Database may be obtained by contacting the Cultural Heritage Coordination Unit on (07) 323 83838 or on the Department's website [www.nrm.qld.gov.au/cultural\\_heritage](http://www.nrm.qld.gov.au/cultural_heritage).

## **A CONDITIONS OF DEVELOPMENT**

### **1. Permitted Road Access Location**

- (i) Vehicular access between the State-controlled roads (i.e. Kennedy Highway and Mareeba Connection Road) and the proposed development shall be via Haren and Constance Streets only, to the satisfaction of Mareeba Shire Council.
- (ii) No direct vehicular access between the State-controlled roads (i.e. Kennedy Highway and Mareeba Connection Road) and the subject land is permitted.

### **2. Land Requirement for Future Road Purposes**

- (i) The attached DMR Plan No. PD 356, dated 30/08/2007 indicates the portion of the subject land required for future road purposes. This area is hereafter referred to as the 'Exclusion Area'.
- (ii) The applicant/landowner shall not construct any structure/s nor commence any development under, on or over the 'Exclusion Area' unless the Department of Main Roads agrees to the proposed structures/works. The Department of Main Roads gives in principal approval for stormwater works and associated easement to be installed and located from the proposed road reserve adjacent proposed lot 18/19 to the creek and approximately 14 metres wide. Details of the stormwater works and associated easement within the exclusion area shall be approved by the Department prior to the installation of the stormwater works.
- (iii) Should the State of Queensland not have acquired the 'Exclusion Area' within twelve (12) months of:
  - the dating and approving of the plan of survey by Council in respect of a Reconfiguration of a Lot application creating residential allotments within 100m of the 'Exclusion Area', and
  - the applicant/landowner formally requesting, in writing, the District Director of the Cairns Office of DMR, or its successor or assign, to acquire/ resume the land,
 then parts (i) and (ii) above shall cease to have effect.

### **3. Road Traffic Noise & Visual Treatments**

For the purposes of this condition:

- 'SCR boundary' shall be defined as the Kennedy Highway and Mareeba Connection Road boundary with the 'Exclusion Area' included in the road reserve; and
- DMR Plan PD85C Rev B (dated 03/2004) shall hereafter be referred to as the 'DMR Buffer Plan'.

#### **(a) Creation of Buffer Strip**

The applicant/landowner shall create a ten metre wide buffer strip within the subject land. The buffer strip shall be located adjacent to the SCR boundary and along the full length of the subject land's SCR boundary with adjoining proposed residential

development, excluding the proposed Park area. This buffer strip shall be provided at no cost to Council or the State of Queensland.

The buffer strip shall be created via:

- a six metre wide freehold strip located adjacent to the SCR boundary, and
- and a four metre wide registered covenant located adjacent to and generally north of the above freehold strip generally in accordance with the DMR Buffer Plan.

The registered covenant shall:

- allow representatives of Council and the Department of Main Road to construct/maintain/upgrade/remove noise attenuation treatments and landscaping within the registered covenant,
- prevent (unless approved by Council and the Department of Main Roads) landowners from altering, damaging or destroying any noise ameliorative treatments or landscaping within the registered covenant, and
- prohibit the construction of any structures within the registered covenant except where approved/required otherwise by Council and the Department of Main Roads.

The freehold section of the buffer strip shall be created and transferred to Council ownership. The registered covenant section of the buffer strip shall be created, and the covenant agreement shall be registered in the Titles Office of the Department of Natural Resources. All three aforementioned requirements shall be completed prior to the applicant/landowner:

- seeking Council (or private certifier) approval for a development permit for carrying out building works within 100m of the SCR boundary, or
- lodging a plan of survey to Mareeba Shire Council within 100m of the SCR boundary for signing and dating,

whichever occurs first.

(b) Visual Amenity Works

The applicant/landowner shall provide landscaping in and along the full width and length of the buffer strip such that existing and future State-controlled road infrastructure, noise ameliorative works within the buffer, and on site buildings and facilities, are screened as much as practicable from each other.

The species of plants used in the landscaping works shall be in accordance with Council's standards. If Council doesn't have standards, then the only requirement is that they are native, low maintenance species which are effective at providing the necessary screening specified above. All works within the buffer strip are to comply with the requirements specified in the DMR Buffer Plan.

All landscaping of the buffer shall be completed prior to the applicant/landowner:

- seeking Council (or private certifier) approval for a development permit for carrying out building works on any part of the subject land within 100 metres of the SCR boundary, or

- lodging a plan of survey to Mareeba Shire Council for signing and dating, where such a plan will create residential lots within 100 metres of the SCR boundary, whichever occurs first.

(c) Road Traffic Noise Ameliorative Works

(i) Location of Works

Road traffic noise ameliorative works shall be incorporated into the design of the development, and the applicant/landowner shall have regard to the design criteria specified within AS3671.

(ii) Maximum Noise Levels and Time Horizons

The following maximum road traffic noise level shall not be exceeded within 10 years of completion of the full development.

- External noise levels shall not exceed 60dB(A) 18h (free field), where existing levels measured at the deemed-to-comply setback distance are greater than 40dB(A) L90 (8h) between 10pm and 6am (free field).
- External noise levels shall not exceed 57dB(A) 18h (free field), where existing levels measured at the deemed-to-comply setback distance are less than 40dB(A) L90 (8h) between 10pm and 6am (free field).
- Internal noise levels (i.e., within buildings above the ground floor level only) shall not exceed the maximum noise levels specified in AS2107-2000.

(iii) Noise Testing

The following parameters shall be used to determine the required noise amelioration works.

- External noise levels shall be those predicted to occur on the subject land in areas likely to be frequently occupied by people for significant periods.
- For residential/accommodation development, internal noise levels shall be determined in accordance with AS2107-2000.
- Noise monitoring shall be carried out in accordance with AS2702-1984.
- Noise predictions shall be carried out in accordance with Calculation of Road Traffic Noise (CRTN88) United Kingdom Department of Transport.

(iv) Road Traffic Noise Report

The applicant/landowner shall prepare a road traffic noise report which demonstrates how the development is to be designed to conform with the above requirements. The report shall:

- predict the road traffic noise levels,
- identify the ameliorative works required within the buffer strip, the rest of the subject land, and the relevant buildings; and

- contain all relevant information and calculations upon which the conclusions of the report are based.

The applicant/landowner shall submit the report to the Cairns Office of the Department of Main Roads, and if necessary, shall amend the report until the Department of Main Roads considers that the report reflects the requirements of this condition. The report and any subsequent amendments shall be completed prior to the applicant/landowner:

- seeking Council (or private certifier) approval for a development permit for carrying out building works within 100m of the SCR boundary; or
  - lodging a plan of survey to Mareeba Shire Council within 100m of the SCR boundary for signing and dating,
- whichever occurs first.

(v) Incorporation of Works into the Development

Noise ameliorative works within the buffer shall conform to the requirements of the DMR Buffer Plan.

All noise ameliorative works required within the development and the buffer shall be completed prior to the applicant/landowner:

- seeking Council (or private certifier) approval for a development permit for carrying out building works within 100 metres of the SCR boundary, or
  - lodging a plan of survey to Mareeba Shire Council for signing and dating, where such a plan will create residential lots within 100 metres of the SCR boundary,
- whichever occurs first.

(vi) Building Covenant

When a covenant is required by the Road Traffic Noise (acoustical) Report then the following requirements shall be met:

- The covenants shall be included on the same Plan of Survey which creates the lots which are subjected to the covenant and lodge concurrently the Plan of Survey and validly executed Covenant Form 31 referred to in the above conditions.
- Acknowledges to Main Roads that an acoustic covenant will be annexed to the REIQ contract for the relevant lots prior to execution of the Covenants Forms 31.
- Submit to Main Roads for approval a Noise Covenant Plan which shows:
  - the final layout plan with finished contour levels and highlighting lots effected by a covenant,
  - summary of noise amelioration works and covenant conditions, and
  - a table showing, pad levels in Australia Height Datum (AHD) and the type of covenant,

prior to execution of the Covenants Forms 31.
- Submit to Main Roads, certification (RPEQ) from the civil engineer that the pad levels in (AHD) used on the Covenant Plan comply with the

acoustical report, prior to the execution of the Covenant Form 31. If the building pad levels have risen by more than 200mm, a new acoustical assessment must be submitted. Any new works or covenants to be registered or amended as detailed in the new acoustical assessment must be completed within the above relevant timeframes.

- Submit to Main Roads a properly executed Covenant Form 31 pursuant to Land Title Act 1994, and in terms approved by the District Director covering all lots where it has not been demonstrated that condition (c)(ii) above would be met, prior to the submission of the Plan of Survey to Council for approval and dating.
- Submit to Main Roads a copy of the receipt of the Registration Confirmation Statements for the Covenants within 14 days of the receipt being forwarded to the applicant or their agents.

#### **4. Advertising**

No advertising device for the proposed development is permitted within the Kennedy Highway or Mareeba Connection Road reserves.

#### **B REASONS**

The reasons and information used in the setting of conditions detailed above include:

- Department of Main Roads Access Policy,
