### 6.2.9.1 Application

- (1) This code applies to assessing development where:
  - (a) located in the Rural zone; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

### 6.2.9.2 Purpose

- (1) The purpose of the Rural zone code is to:
  - (a) provide for rural uses including cropping, intensive horticulture, intensive animal industries, animal husbandry, animal keeping and other primary production activities;
  - (b) provide opportunities for non-rural uses that are compatible with agriculture, the environmental features, and landscape character of the rural area where the uses do not compromise the long-term use of the land for rural purposes;
  - (c) protect or manage significant natural resources and processes to maintain the capacity for primary production.
- (2) Mareeba Shire Council's purpose of the Rural zone code is to recognise the importance of primary production to the economy of the region and to maintain and strengthen the range of primary industries which contribute to the rural economy.

The purpose of the Rural zone code is to:

- (a) recognise the diversity of rural uses that exists throughout the region;
  - (b) protect the rural character of the region;
  - (c) provide facilities for visitors and tourists that are accessible and offer a unique experience;
  - (d) protect the infrastructure of the Mareeba-Dimbulah Irrigation Scheme Area from development which may compromise long term use for primary production;
  - (e) maintain distinct boundaries between the rural areas and the villages, towns and urban areas of the region;
  - (f) provide for a range of uses, compatible and associated with rural or ecological values including recreational pursuits and tourist activities;
  - (g) prevent adverse impacts of development on ecological values;
  - (h) preserve land in large holdings; and
  - (i) facilitate the protection of strategic corridors across the landscape which link remnant areas of intact habitat and transport corridors.
- (3) The purpose of the Rural zone code will be achieved through the following overall outcomes:
    - (a) Areas for use for primary production are conserved and fragmentation below economically viable lot sizes is avoided;
    - (b) The establishment of a wide range of rural pursuits is facilitated, including cropping, intensive horticulture, forestry, intensive animal industries, animal husbandry and animal keeping and other compatible primary production uses;
    - (c) The establishment of extractive industries, mining and associated activities and alternative forms of energy generation is appropriate where environmental impacts and land use conflicts are minimised;
    - (d) Uses that require isolation from urban areas as a consequence of their impacts such as noise or odour may be appropriate where land use conflicts are minimised;

- (e) Development is reflective of and responsive to the environmental constraints of the land;
- (f) Residential and other development is appropriate only where directly associated with the rural nature of the zone;
- (g) Low-impact tourism and recreation activities do not compromise the long-term use of the land for rural purposes;
- (h) The viability of both existing and future rural uses and activities is protected from the intrusion of incompatible uses;
- (i) Visual impacts of clearing, building, materials, access ways and other aspects of development are minimised or appropriately managed;
- (j) Adverse impacts of development both on-site and from adjoining areas are avoided and any impacts are minimised through location, design, operation and management; and
- (k) Natural features such as creeks, gullies, waterways, wetlands and bushland are retained, managed, enhanced and separated from adjacent development.

<p><b>Amenity</b></p>			

<p><b>PO6</b> Development must not detract from the amenity of the local area, having regard to:</p> <ul style="list-style-type: none"> <li>(a) noise;</li> <li>(b) hours of operation;</li> <li>(c) traffic;</li> <li>(d) advertising devices;</li> <li>(e) visual amenity;</li> <li>(f) privacy;</li> <li>(g) lighting;</li> <li>(h) odour; and</li> <li>(i) emissions.</li> </ul>	<p><b>AO6</b> No acceptable outcome is provided.</p>	<p style="text-align: center;">✓ Complies with PO6</p>	<p>Performance Outcome PO6 of the Rural zone code ensures that new development is appropriately managed to minimise impacts on the amenity experienced in the immediate vicinity of the development site. In terms of sensitive land uses, the closest dwelling is situated approximately 900 metres to the north of the proposed RV/Caravan area/Function Facility. Event Site 2 (beside the large dam) is approximately 1.1 kilometres from the closest dwelling house.</p> <p><b>Noise</b> – A condition of approval has been included to ensure that the proposed development is operated in such a way as to not cause an ‘environmental nuisance’ as defined by the Environmental Protection Act 1994 with regards to emissions (noise, light, dust etc.). The Kuranda Roots Festival has been held on the subject site (Event Site 2) for the past three (3) years without reports of noise nuisance. The land has been used as a tourist park (12 bush camp sites) since 2015, again without any reports of</p>

			<p>nuisance being caused.</p> <p>Due to the size of the subject site and the one (1) kilometre separation distance between Event Site 2 and the closest sensitive land use (dwelling house), an external acoustic assessment was not required. The development has been reasonably conditioned to allow the applicant to manage the event sites and place the most appropriate events at each site (eg events likely to be noisier can be sited at Event Site 1, which has the larger separation distance). The development has further been conditioned to require a Noise Management Plan and to establish a Complaint Investigation Process. Similar conditions were placed on the Springmount Raceway development approval.</p> <p><b>Hours of operation –</b>  Due to the nature of the proposed development, hours of operation have not been proposed by the applicant. The tourist park aspect will involve guests being on site 24 hours a day, 7 days a week. Similarly, large events (Kuranda</p>
--	--	--	--

			<p>Roots Festival) occur over multiple days with guests remaining on site through-out the event.</p> <p>The only specific hour limit being proposed as a condition is to prevent amplified music at Event Site 2 and the Function Facility between the hours of 12 midnight and 7:00am.</p> <p><b>Traffic</b> – Council Officers sought external expert assessment and advice in respect of the developments traffic impacts from NJM Engineering Consulting, a specialist transport engineer.</p> <p>NJM Engineering Consulting have assessed the applicant's Traffic Impact Assessment (TIA) and recommend reasonable conditions. Safe road access will be ensured through the conditioned road safety assessments and pavement condition assessments for large events.</p> <p>The applicant will be required to undertake all works identified through the road safety assessments to bring both roads to an acceptable level of safety.</p> <p><b>Advertising devices</b> – No advertising</p>
--	--	--	--

			<p>devices have been proposed.</p> <p><b>Visual amenity</b> – All proposed development will be largely screened from view (from roads/adjoining lots) by distance and vegetation.</p> <p><b>Privacy</b> – Similar to visual amenity, privacy will be maintained due to the subject site's size and the developments distance from sensitive land uses.</p> <p><b>Lighting</b> – A condition of approval has been included ensuring that light emitted from the development does not cause nuisance to any neighbouring property.</p> <p><b>Odour &amp; Emissions</b> – The proposed development is not likely to produce significant amount of odour or other emissions such as dust and smoke. The significant distance to sensitive land uses will mitigate any potential nuisance emission caused by emissions.</p> <p>Subject to appropriate conditioning, it is considered that the proposed development can achieve compliance with PO6.</p>

Performance outcomes	Acceptable outcomes	Complies	Comments
<p><b>PO7</b> Development must take into account and seek to ameliorate any existing negative environmental impacts, having regard to:</p> <ul style="list-style-type: none"> <li>(a) noise;</li> <li>(b) hours of operation;</li> <li>(c) traffic;</li> <li>(d) advertising devices;</li> <li>(e) visual amenity;</li> <li>(f) privacy;</li> <li>(g) lighting;</li> <li>(h) odour; and</li> <li>(i) emissions.</li> </ul>	<p><b>AO7</b> No acceptable outcome is provided.</p>	<p>✓</p>	<p>There are no known negative environmental impacts requiring amelioration.</p>

## 8.2.1 Agricultural land overlay code

### 8.2.1.1 Application

- (1) This code applies to assessing development where:
  - (a) land the subject of development is located within the agricultural land areas identified on the **Agricultural land overlay maps (OM-001a-n)**; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

Note—Agriculture is appropriately reflected in Overlay Map 1 and is required to be mapped by State Government in response to Economic Growth State Interests.

### 8.2.1.2 Purpose

- (1) The purpose of the Agricultural land overlay code is to protect or manage important agricultural areas, resources, and processes which contribute to the shire's capacity for primary production.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) The alienation, fragmentation or reduction in primary production potential of land within the 'Class A' area or 'Class B' area is avoided, except where:
    - (i) an overriding need exists for the development in terms of public benefit,
    - (ii) no suitable alternative site exists; and
    - (iii) the fragmentation or reduced production potential of agricultural land is minimised;
  - (b) 'Class A' areas and 'Class B' areas continue to be used primarily for more intensive agricultural activities which utilise the land quality provided in these areas;
  - (c) Grazing on very large land holdings is maintained as the dominant rural activity in the 'Broadhectare rural' area; and
  - (d) Land with the 'Broadhectare rural' area is maintained in its current configuration.

## 8.2.4 Environmental significance overlay code

### 8.2.4.1 Application

- (1) This code applies to assessing development where:
  - (a) land the subject of development is affected by a constraint category identified on the **Environmental significance overlay maps (OM-004a-z)**; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

Note—Biodiversity and Water quality are appropriately reflected in Overlay Map 4 and is required to be mapped by State Government in response to Environment and Heritage State Interests.

### 8.2.4.2 Purpose

- (1) The purpose of the Environmental significance overlay code is to identify and protect matters of environmental significance, which include matters of state environmental significance (MSES) as defined under the state planning policy.

The Environmental significance overlay code ensures that:

- (a) waterways and high ecological significance wetlands are protected and enhanced to maintain ecosystem services and hydrological processes and provide aquatic habitat for flora and fauna; and
  - (b) the environmental values of regulated vegetation, wildlife habitat, protected areas and legally secured offset areas are protected and managed.
- (2) The purpose of the code will be achieved through the following overall outcomes:
    - (a) the biodiversity values, ecosystem services and climate change resilience of areas of environmental significance are protected, managed, enhanced and rehabilitated;
    - (b) the biodiversity values of protected areas and legally secured offset areas are protected from development unless overriding community need is demonstrated;
    - (c) development is located, designed and managed to minimise the edge effects of development on areas of regulated vegetation and wildlife habitat;
    - (d) areas of regulated vegetation and wildlife habitat are managed to minimise biodiversity losses;
    - (e) development maintains, protects and enhances a regional network of vegetated corridors that assist in wildlife movement and contribute to the maintenance of habitat and biological diversity;
    - (f) development is appropriately setback from waterways and high ecological significance wetlands to minimise direct and indirect impacts on water quality and biodiversity; and
    - (g) riparian vegetation and vegetation associated with high ecological significance wetlands is protected and enhanced to improve water quality and natural ecosystem function.

## 8.2.8 Hill and slope overlay code

### 8.2.8.1 Application

- (1) This code applies to assessing development where:
  - (a) land the subject of development is located within a 'Hill and slope area' identified on the **Hill and slope overlay maps (OM-008a-o)**; and
  - (b) it is identified in the assessment benchmarks for assessable development and requirements for accepted development column of an assessment table in Part 5 of the planning scheme.

Note—Natural hazards are appropriately reflected in Overlay Maps 3, 6 and 8 and are required to be mapped by State Government in response to Hazard and Safety State Interests.

### 8.2.8.2 Purpose

- (1) The purpose of the Hill and slope overlay code is to ensure the ongoing stability of land within a hill and slope area to prevent risk to people or property.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Development is located to avoid sloping land where practical; and
  - (b) Development on sloping land maintains slope stability and does not increase the potential for erosion or landslide.
