Planning Scheme: Mareeba Shire Council Planning Scheme 2016

#### DECISION DETAILS

Type of Decision: Approval  
Development Permit for Operational Works (Roadworks, Bulk Earthworks, Water and Sewer Supply Works Only - **Excluding Stormwater Drainage Works**) for Development Permit RAL/21/0024  
Type of Approval:  
Date of Decision: 11 August 2022

#### CURRENCY PERIOD OF APPROVAL

The currency period for this development approval is two (2) years starting the day that this development approval takes effect. (Refer to Section 85 "Lapsing of approval at end of currency period" of the *Planning Act 2016*.)

**INFRASTRUCTURE**

Where conditions relate to the provision of infrastructure, these are non-trunk infrastructure conditions unless specifically nominated as a “*necessary infrastructure condition*” for the provision of trunk infrastructure as defined under Chapter 4 of the *Planning Act 2016*.

**ASSESSMENT MANAGER CONDITIONS****(A) ASSESSMENT MANAGER’S CONDITIONS (COUNCIL)****(a) General**

- (i) This development permit applies to the **roadworks, bulk earthworks, water and sewer supply components of the operational works only** as included on the approved plans. This development permit does not authorise the construction of any stormwater drainage components including but not limited to the underground stormwater drain proposed along Tilse Street, internal underground stormwater works and any stormwater infrastructure proposed to include the use of "blackmax" piping. A subsequent development permit will be issued for this component of works.

All works covered under this development permit will not be placed "on-maintenance" until a subsequent development permit is issued for the stormwater drainage components and the stormwater drainage works have been completed in full, to the satisfaction of Council's delegated officer.

- (ii) All operational works must be designed and constructed in accordance with the procedures as set out in the FNQROC Development Manual.
- (iii) Development must be carried out substantially in accordance with the approved plans and the facts and circumstances of the use as submitted with the application, and subject to any alterations:
- found necessary by the Council’s Delegated Officer at the time of examination of the engineering plans or during construction of the development because of particular engineering requirements;
  - to ensure the works comply in all respects with the requirements and procedures of the FNQROC Development Manual and good engineering practice; and
  - to ensure compliance with the following conditions of approval.
- (iv) Council’s examination of the documents should not be taken to mean that the documents have been checked in detail and Council takes no responsibility for their accuracy. If during construction, inadequacies of the design are discovered, it is the responsibility of the Principal Consulting Engineer to resubmit amended plans to Council for approval and rectify works accordingly.

- (v) Upon completion of excavation and filling works, a statement of compliance of works endorsed by a Registered Professional Engineer of Queensland (RPEQ) must be submitted to Council.

**(b) Pre-start Meeting**

- (i) In addition to the requirements of Clause CP1.07 and CP1.08 of the FNQROC Development Manual; after documentation has been approved by Council, a pre-start meeting is to be held on site prior to the commencement of work. Part 1 of the **attached** pre-start meeting pro-forma is to be completed and returned prior to the meeting including clause 1.u 'Request for Meeting' together with the prescribed Construction Monitoring Fee as set out in Council's Schedule of Fees.

**(c) Inspections**

- (i) Inspections are to be carried out as detailed in the FNQROC Manual unless advised otherwise at the pre-start meeting.

**(d) Construction Security Bond and Defects Liability Bond**

- (i) In addition to Clauses CP1.06 and CP1.20 of the FNQROC Development Manual; the Construction Security Bond and Defects Liability Bond shall each be a minimum of \$1000 and Bank Guarantees shall have no termination date.
- (ii) During the Defects Liability period, it is the responsibility of the developer to rectify any works found to be defective due to design faults and or found to exhibit faults attributed to the performance of the construction activities in terms of quality and conformance with design and specifications. The bond will be returned on satisfactory correction of any defective work and after expiration of the maintenance period. Failure to comply with a Council issued instruction to correct defective work may result in the call up of the bond to have the work completed.

**(e) Hours of Work**

- (i) Work involving the operation of construction plant and equipment of any description, shall only be carried out on site during the following times:
- 7.00am to 6.00pm, Monday to Friday;
  - 7.00am to 1.00pm Saturdays;
  - No work is permitted on Sundays or Public Holidays.
- (ii) No variation to the above working hours is allowed unless otherwise agreed in writing by Council.

**(f) Transportation of Soil**

- (i) All soil transported to or from the site must be covered to prevent dust or

spillage during transport. If soil is tracked or spilt onto the road pavement from works on the subject land, it must be removed no later than at the end of each working day. Sediment must not enter Council's stormwater drainage network.

Taking this step will defer your appeal period, which will commence again from the start the day after you receive a "negotiated decision notice".
