Given the subject property is 860m², the proposed development will trigger a code assessable development application requiring assessment against the below relevant codes:-

- Accommodation activities code
- Low density residential code
- Parking and Access Code
- Works, services and infrastructure code
- Landscaping Code

Please find below our code assessment of the building work which demonstrates compliance with the applicable performance criteria.

For accepted development subject to requirements and assessable development		
Height		
PO1 Building height takes into consideration and respects the following: <ul style="list-style-type: none"> (a) the height of existing buildings on adjoining premises; (b) the development potential, with respect to height, on adjoining premises; (c) the height of buildings in the vicinity of the site; (d) access to sunlight and daylight for the site and adjoining sites; (e) privacy and overlooking; and (f) site area and street frontage length. 	AO1 Development has a maximum building height of: <ul style="list-style-type: none"> (a) 8.5 metres; and (b) 2 storeys above ground level 	Complies
Outbuildings and residential scale		
PO2 Domestic outbuildings: <ul style="list-style-type: none"> (a) do not dominate the lot on which they are located; and (b) are consistent with the scale and character of development in the Low- density residential zone. 	AO2 Domestic outbuildings do not exceed: <ul style="list-style-type: none"> (a) 100m² in gross floor area; and (b) 5.5 metres in height above natural ground level. 	Complies
Siting		
PO3 Development is sited in a manner that	AO3.1 Buildings and structures include a minimum setback	Does not comply with AO3.1 (a) Complies with PO3

Performance outcomes	Acceptable outcomes	Applicant response
<p>considers and respects:</p> <ul style="list-style-type: none"> (a) the siting and use of adjoining premises; (b) access to sunlight and daylight for the site and adjoining sites; (c) privacy and overlooking; (d) opportunities for casual surveillance of adjoining public spaces; (e) air circulation and access to natural breezes; and (f) appearance of building bulk; and (g) relationship with road corridors. 	<p>of:</p> <ul style="list-style-type: none"> (a) 6 metres from the primary road frontage; and (b) 3 metres from any secondary road frontage. 	<p>Due to the subject allotment being a corner allotment and the shape of the front boundary following the contours of the road, the proposed dual occupancy is to be setback 4426mm from the front boundary at the OMP of the eastern dwelling and 5934mm at the OMP of the western dwelling.</p> <p>The proposed setback of 4426mm on the eastern will not affect the views and outlook of neighbouring residents as there is a large tree between the two allotments that will largely block out the works and provide privacy to both allotments, furthermore, the proposed works are small single storey dwellings that will not add bulk within the streetscape. As there is a large tree there, the proposed works will not be able to affect the amount of light and ventilation to the dwelling.</p> <p>As for the western dwelling, the 66mm encroachment is thought to be minor and pose no effect on any of the performance outcomes.</p>
	<p>AO3.2</p> <p>Buildings and structures include a minimum setback of 2 metres from side and rear boundaries.</p>	<p>Does not comply with AO3.2 Complies with PO3</p> <p>The proposed setback to the rear/ side boundaries of the properties are 1500mm to the eaves, and 2100mm to the walls. This displays that all habitable rooms will be setback greater than the 2000mm required, and as such, there is not believed to be any effect on the privacy or amenity of residents, and as there is a 2100mm space to the wall, light and ventilation is believed to be able to service rooms appropriately.</p>
Accommodation density

AO4 Development provides a maximum density for Accommodation activities in compliance with Table 6.2.6.3B .	
Gross floor area
