ASSESSMENT MANAGER CONDITIONS

(A) ASSESSMENT MANAGER’S CONDITIONS (COUNCIL)

(a) General

- (i) All operational works must be designed and constructed in accordance with the procedures as set out in the FNQROC Development Manual.
- (ii) Development must be carried out substantially in accordance with the approved plans and the facts and circumstances of the use as submitted with the application, and subject to any alterations:
 - found necessary by the Council’s Delegated Officer at the time of examination of the engineering plans or during construction of the development because of particular engineering requirements;
 - to ensure the works comply in all respects with the requirements and procedures of the FNQROC Development Manual and good engineering practice; and
 - to ensure compliance with the following conditions of approval.
- (iii) Council’s examination of the documents should not be taken to mean that the documents have been checked in detail and Council takes no responsibility for their accuracy. If during construction, inadequacies of the design are discovered, it is the responsibility of the Principal Consulting Engineer to resubmit amended plans to Council for approval and rectify works accordingly.
- (iv) Note, this approval is for a water storage dam only. The dam is NOT to be used for swimming. If it is to be used for swimming then a separate Development Permit will need to be obtained for building work.

- (b) Filling or excavation (excluding access roads) is not permitted within 1.5 metres of any property boundary.

(c) Hours of Work

- (i) Work involving the operation of construction plant and equipment of any description, shall only be carried out on site during the following times:
 - 7.00am to 6.00pm, Monday to Friday;

If soil is tracked or spilt onto the road pavement from works on the subject land, it must be removed no later than at the end of each working day. Sediment must not enter Council's stormwater drainage network.
- (e) Dam Construction
- (i) Dam construction must be undertaken in accordance with design plan prepared by Golder Associates.
- (ii) Within three (3) months following the completion of construction of dam works, any disturbed areas are grassed to provide a coverage of at least 8m² in every 10m² to minimise the potential for erosion or dust.
- (iii) At the completion of construction, the applicant/developer is to provide Council with certification from a RPEQ engineer confirming that the dam has been constructed in accordance with the certified design plan and engineering advice listed in (i) above.
