 - to ensure compliance with the following conditions of approval.
2. Timing of Effect
 - 2.1 The conditions of the development permit must be complied with to the satisfaction of Council’s delegated officer prior to the commencement of the use except where specified otherwise in these conditions of approval.
 - 2.2 Prior to the commencement of use, the applicant must notify Council that all the conditions of the development permit have been complied with, except where specified otherwise in these conditions of approval.
3. General
 - 3.1 The development approval would not have been issued if not for the conditions requiring the construction of infrastructure.
 - 3.2 The applicant/developer is responsible for the cost of necessary alterations to existing public utility mains, services or installations required by works in relation to the proposed development or any works required by condition(s) of this approval.
 - 3.3 All payments or bonds required to be made to the Council pursuant to any condition of this approval must be made prior to commencement of the use and at the rate applicable at the time of payment.
 - 3.4 All works must be designed, constructed and carried out in accordance with FNQROC Development Manual requirements (as amended) and to the satisfaction of Council’s delegated officer.

3.5 Noise Nuisance

Refrigeration equipment, pumps, compressors and mechanical ventilation systems must be located, designed, installed and maintained to achieve a maximum noise level of 3dB(A) above background levels as measured from noise sensitive locations.

The applicant is required to install and maintain suitable screening to all air conditioning, lift motor rooms, plant and service facilities located at the top of or on the external face of the building. The screening structures must be constructed from materials that are consistent with materials used elsewhere on the facade of the building. There are to be no individual external unscreened air conditioning units attached to the exterior building facade.

3.6 Waste Management

On site refuse storage areas must be provided and be screened from view from adjoining properties, road reserve and the shared access driveway by 1 metre wide landscaped screening buffer, 1.8m high solid fence or building.

3.7 Letterbox

Each unit is to be provided with an individual letter box.

3.8 Clothes Drying area

Sufficient area for clothes drying is to be provided in addition to the open space requirements of the units and is to be appropriately screened from view of adjoining properties and Herberton Street.

4. Infrastructure Services and Standards

4.1 Access

An access crossover must be constructed (from the edge of the road pavement to the property boundary of the subject lot) in accordance with FNQROC Development Manual Standards, to the satisfaction of Council's delegated officer.

The applicant/developer is to make an application for driveway access onto a Council road. The application is to be accompanied by the relevant fee and will be required to certify or be assessed for compliance by Council's delegated officer.

The applicant/developer must ensure the development is provided with 2 undercover car parking spaces (1 per unit) and 1 visitor parking space (covered or uncovered), which are available solely for the parking of vehicles associated with the use of the premises.

A reversing bay (as shown on the submitted plans) must be provided in addition to any visitor parking so that vehicles have the ability to exit the property in a forward gear.

All car parking spaces and internal driveways (including the reversing bay) must be concrete sealed and appropriately drained prior to the commencement of the use and to the satisfaction of Council's delegated officer.

All car parking spaces and internal driveways must be constructed in compliance with the following standards, to the satisfaction of Council's delegated officer:

Illumination resulting from direct, reflected or other incidental light emanating from the subject land does not exceed 8 lux when measured at any point 1.5m outside the property boundary of the subject site. The lighting fixtures installed on site must meet appropriate lux levels as documented within Australian Standard 4282 – Control of the Obtrusive Effects of Outdoor Lighting.

4.6 Water Supply

Where the existing reticulated water supply does not currently service the site or is not at an adequate capacity, the developer is required to extend or upgrade the reticulated water supply infrastructure to connect the site to Council's existing infrastructure at a point that has sufficient capacity to service the development in accordance with FNQROC Development Manual standards (as amended).

If a new or upgraded water service connection is required to service the development, it must be provided in accordance with FNQROC Development Manual standards (as amended) to the satisfaction of Council's delegated officer.

Each unit is required to be **separately metered**.

4.7 Sewerage Connection

The developer must connect the proposed development to Council's reticulated sewerage system in accordance with FNQROC Development Manual standards (as amended) to the satisfaction of Council's delegated officer.

Where sewerage connections are not available to the site, or where existing connections are not satisfactory for the proposed development, the developer is required to extend or upgrade the reticulated sewerage infrastructure to connect the site to Council's existing infrastructure at a point that has sufficient capacity to service the development in accordance with FNQROC Development Manual standards (as amended).
