Existing Solar Light Poles

Educational Signage/ Interpretive

Replas Post / Natural Barrier

Maintenance Access Gate

Information/ Overall Map

Directional Signage

*Note: Pump track, Flying fox and Adventure play space are subject to community input and budget constraints.

2 ADVENTURE PLAY SPACE CHARACTER IMAGES

2.1 Design Intent

We envisage this node to be a unique space that reflects the character of its context and is not simply defined by a large scale ‘‘off the shelf’’ element that could be found anywhere else. Rather, it should be defined by the form and narrative of the elements that reference the rich sense of place that makes the Mareeba Shire unique, and the natural setting of the Bicentennial Lakes precinct.

2.2 Play Experience

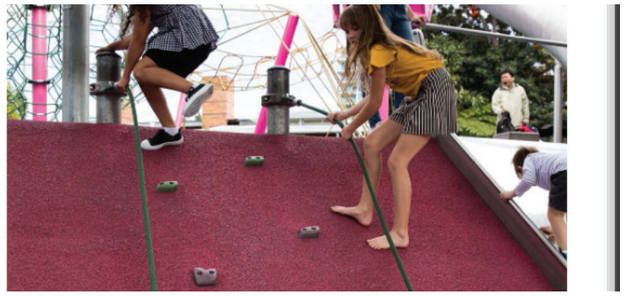
The overall experience and elements within the design will embrace and reflect Mareeba’s unique qualities and culture. A sense of public ownership will be created by engaging with the community and collaborating with artists to design sculptural elements. Each element will be skilfully designed and constructed in a coherent contextually relevant theme, resulting in outcomes that are both aesthetically appealing to children and adults.

Natural creek treatment

Double sloping flying fox

Modular play equipment

Rope climb



Fort with talking tube

Swings

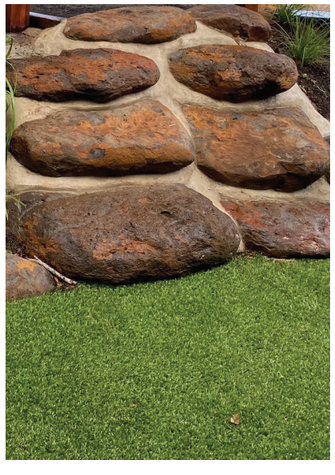
Communal BBQ shelter

Embankment slides

Fossil dig

Steps

Boulder climb



Water pump

Cargo net

Balance beam

Pump track
